CAUTION!

Our friends and customers will please to observe our number, (52) which is legibly painted on each side of the door way. And also the sign of

over the door. There being similar entrances a few doors from ours, people are very apt to get up the *wrong* stairs, unless they observe the above precaution.

52 IS THE NUMBER.

No. 52 Washington St., Boston.

From the above view the beholder may gather some idea of the results of our labor. Ten or twelve years ago, we commenced our business in one small room. Since then we have added room after room, as our business required, till we have spread 'the implements of the world's intelligence,' over five stores on Washington street, and pushed our territory eastward from Washington street, as far back as Wilson's Lane; and which, for the present, seems to be the *boundary line* to our ambition in that quarter. Well, we begin to think our office large enough, and full enough of every requisite thing for the execution of all the kinds of Printing the world ever saw — certainly enough, we think, to suit the fancy of any customer that may come along: from him whose wants are of the most ordinary kind, to him who aspires to the most costly and elaborate productions of our office. To sum up the whole, **WE ARE PREPARED TO EXECUTE ALL KINDS OF PRINTING IN THE BEST AND MOST EXPEDITIOUS MANNER**; having an abundance of room and materials, and some of the most skilful workmen belonging to the trade.

EMBOSSSED CARDS.

This is a business not known in this country till recently and may be said to belong to ORNAMENTAL PRINTING. Shortly after the introduction into Boston of THE ROTARY PRESS S. N. DICKINSON procured a very efficient Embossing Press, and from Plates cut by the most skillful Artists, he has produced many beautiful specimens of Embossed Cards, (A SUPPLY OF WHICH HE CONSTANTLY KEEPS ON HAND. They may also be had at the store of Messrs. THOMAS GROOM & Co., 82 State Street.) A great variety of Plates have been cut within the last two years, making, altogether, a very large assortment, and embracing a great variety of subjects. Among them is one commemorative of the death of President Harrison. Shortly after the cutting of this well-executed and highly-finished plate, S. N. D. received many commendations of its style and execution from several distinguished gentlemen. We here insert some of these commendations, as serving to show the estimation in which our Embossing is held:—

Mr. S. N. Dickinson:

Dear Sir—I would hereby present you with my cordial thanks for allowing me the opportunity of examining your beautiful specimen of Invitation Cards, struck in remembrance of our late venerated and popular Chief, PRESIDENT HARRISON. It is highly creditable to you as a patriot and a mechanic. I wish that this Card, one of the fruits of your indefatigable spirit of inventive professional enterprise, may become generally known; for if it should be so, I can have no fear but that it will be generally and generously patronized. It seems to me to be one of your best efforts in that line, uniting most happily the conceptions of a patriotic genius, with a felicitous mechanical execution. Your obliq'd friend,
SAM'L T. ARMSTRONG.

Mr. Dickinson:

Dear Sir—The embossed Visiting Cards, of which you have been pleased to send me a specimen, are executed in a style highly creditable to the skill and industry which you have displayed in the productions of your press. They are truly beautiful, and well conceived as testimonials of respect for the memory of GENERAL HARRISON, whose image and superscription they bear. I shall be gratified to know that those who have influence in the world

of fashion, (of which number I am not,) shall think proper to encourage the art which you have advanced to such perfection, by using them for a time as Visiting Cards, exclusively. Your ob't serv't,
H. G. OTIS.

Dear Sir—I have received the very handsome Cards you did me the favor to send me. I beg leave, in returning my thanks, to express the pleasure with which I have examined this specimen of your taste and skill. The beauty of the design and the perfection of the impression are well suited to each other, and will, I trust, induce the public to reward the exertions of a talent so successfully displayed. Your ob't serv't,
SAM'L A. ELIOT.

Mr. S. N. Dickinson:

Dear Sir—The Cards which you sent me last evening, and which are intended as a memorial of the late PRESIDENT HARRISON, are, I think, a splendid specimen of the perfection to which the art of embossing and printing has been carried by you, and deserve public attention and encouragement. Whoever has an eye for the beautiful in design and execution, will see that the die was cut by a most skillful artist, and that the ornaments are in the best taste. Truly yours,
May 4. P. O. THACHER.

The plate referred to above, in point of design and workmanship, is not superior to many others we have. And we merely select this ONE AS A SAMPLE OF THE WHOLE.

PREFACE.

For the seventh time this concise Annual is presented to the Public, gradually but essentially improved, from year to year. It has been viewed as one of the best features in the catalogue of improvements, that a LOCAL BUSINESS DIRECTORY was introduced, last season. It was the first effort towards a miniature City Directory, which has met the decided approbation of the community. In the present number of the Almanac, the system so acceptably commenced, has been continued, nearly perfected, and is, consequently of more general utility. Persons residing in the environs of Boston, and even throughout New England, have found this Directory extremely convenient. Particular attention has therefore been devoted to it, that it might be a guide for the stranger, as well as the resident of the City. Time will doubtless suggest alterations and emendations, according to the varying condition of society, which will be adopted, as the future shall reveal the necessity of changes.

No efforts will be wanting on the part of the editor, to give an annually increasing value to the labor confided to his care. It is fully believed that the present volume will meet the approbation of an indulgent Public, in 1842. *January.*

Entered according to act of Congress, in the year 1841, by
SAMUEL N. DICKINSON,
In the Clerk's Office of the District Court of the District of Massachusetts.

This Court has jurisdiction of all crimes, except those where death is the punishment; these cases the law requires to be tried in the Supreme Judicial Court, the highest judicial tribunal. No appeal from questions of fact are now allowed, but questions of law may be revised before sentence, by the Su-

preme Court. The Municipal Court is a Court of *oyer and terminer*, and *general gaol-delivery*; and as such holds terms every month in the year. Though the increase and great pressure of its business keeps it in almost constant session, yet cases are very deliberately and fairly tried there.

34 Events in Boston during the year 1841.

There is an acknowledged utility in keeping a diary of local events. While it is gratifying to look back upon the past, it enables us to judge of the progress of society, by contrasting the present with the condition of former days. A journal of this kind, therefore, becomes a statistical index to bygone generations, by chronicling the topics which were prominent subjects, variously agitating the public mind at the period of their occurrence. Another purpose is served by recording striking events, even of a local character, from the circumstance that we are admonished of a variety of dangers and contingencies, which are almost necessary accompaniments of a great commercial city, that may have a direct bearing upon our health, personal comfort, and the security of property.

JANUARY.

2. The Steamship *Caledonia* leaves East Boston for Halifax and Liverpool.

4. Cordelia B. Litchfield was divorced from her husband, Paul B. Litchfield, by a decree before Judge Wilde. This was a divorce *a vinculo matrimonii*, which left the lady a right to marry again, but interdicted Litchfield. Whether she can contract a legal marriage again in Massachusetts, is a question.

A fellow calling himself *Doctor Watson*, declared publicly in the Marlboro' Chapel, that in the course of four years and a half, he had drawn from the citizens of Boston *one hundred barrels of blood*, and administered *forty-nine pounds of mercury*.

Catherine Osgood was also divorced from Joseph H. Osgood. The history of the case was singular.—They had separated, by mutual consent, years ago, and signed documents to that effect. On the strength of that instrument, Osgood went into Maine and married again, and had 14 children by the last wife. Mrs. O.'s prospects, eventually, required some definite legal arrangement, which was the cause of a petition for divorce. It so happens, that the whole bevy of 14 children are illegitimate.

8. Whole number of votes for Governor and Lieutenant Governor, as reported to the General Court, were,—for Governor, 127,313; necessary for a choice, 63,657. John Davis had 70,884; Marcus Morton, 55,169; G. W. Johnson, 1,081; others, 179. Whole number for Lieut. Governor, 127,180; necessary for a choice, 63,591. Geo. Hull had 71,486; Nathan Willis, 54,390; A. Bliss, 1,124; others, 180.

13. Judah Touro, of New Orleans, gave \$10,000 towards completing the Bunker Hill Monument. Although a native of Newport, R. I., he received his commercial education in Boston, in the counting house of Moses M. Hayes, but left for New Orleans in 1800.

21. At sunrise, to-day, signal guns announced the *Acadia Steamer*, from England, having a passage of 15 1-2 days, bringing 102 passengers, 33 of whom belonged to New York.

27. Died at Boston, Col. Joseph May, aged 81. He was upwards of 40

years the secretary of an insurance company; and was a man greatly esteemed for his amiable and benevolent character, and for his virtuous and useful life.

29. Judge Fuller, of Augusta, Me., Probate Judge of the County of Kennebec, returning on foot from Cambridge, where he had visited a son, although in perfect health, to all appearance, fell upon the sidewalk. On being removed into an apothecary shop, he died without speaking; probably by a disease of the heart.

2. At the west part of the city, there was considerable disturbance, arising out of an assault of James Dennie on a highly respectable citizen, Z. Jellison, Esq. The Grand Jury found a bill against Dennie. He was afterwards tried (June 15,) and sentenced by Judge Thacher to two months imprisonment in the county jail.

The clerk in H. Bailey & Co.'s store, whose name is M. C. Faught, was sitting near the stove, reading, at about a quarter before 9, when he heard a key enter the door, pushing out the one inside, which dropped to the floor. Suspecting something wrong, he stepped to a drawer and took out two loaded pistols, and concealed himself behind the counter. The robber entered, turned up the gas, and proceeded to the safe.

Having selected and packed in a bag whatever he desired, in the act of going out, the clerk rose up; at which the villain fired upon him, and the clerk, having also a pistol, returned it. In his hasty flight, the robber dropped the property. A hat was subsequently found, having *John Buttler* written in it.

This was between 6 and 7 in the morning, and he died in dreadful agony about 1 o'clock.

Ferguson, jr., an indicted burglar, escaped from the Northern Jail, Leverett st., in which he was the only prisoner, by picking a padlock, 18 inches beyond him, on the outside of the cell door, with wire taken from the rim of a tin cup. Thence he ascended the flue of a chimney, reached the roof, and then, fastening his blanket, torn into strips, on the iron stays, descended to the ground—climbed over a fence 20 feet high—and escaped.

An appropriate inscription on a silver plate, was placed in a box, hermetically closed, containing also American coins, copies of all the Boston newspapers, &c. together with the names of the officers who superintended the erection of the edifice. The whole was placed in a cavity cut in the north-east corner stone. A copy of the Boston Directory and Boston Almanac, were also enclosed in the box among other things, which will reveal at some exceedingly remote age, perhaps, the population and condition of Boston in 1841.

9. A report of the ecclesiastical council which had under consideration the existing difficulties between the Rev. John Pierpont and the Hollis Street Society, was published this morning. It does not recommend a dissolution of his pastoral relation.

The city government offered a reward of one thousand dollars, for the detection and conviction of the scoundrels.

18. The Steamer Caledonia arrived in port last evening, having left Liverpool on the 4th—therefore making the voyage in a little more than 14 days. She brought 42 passengers. 4. During the week (and particularly to-day, Saturday,) the money market was unusually tight; interest ranging as high as from 2 to 3 per cent, even on undoubted paper. Various causes are assigned for this spasmodic action in our money affairs. The true cause, we think, may be found in our importations. Without a protecting tariff, our moneyed institutions, as well as moneyed men, must be subject more or less to these distressing convulsions.

Great excitement to-day in consequence of the teller of the Eagle bank having collusively permitted George F. Cook & Co., brokers, to overdraw, by certifying on their checks that they were good, when they had no money in bank. It is believed that a loss will

noon he cut his throat, having constantly persisted in the intention of suicide.

15. A house in Travers street, occupied by a woman named Julia Carr, forcibly entered at noon day by some robbers. They were resisted by the only person in it at the time, a girl named Rebecca Austin, but she being soon beaten down, and left for dead, they proceeded with their robbery, and took money, jewelry, etc. to the amount of \$5000. They got off without detection. It is possible the girl may recover from her wounds. Truly, may she reflect, that 'the wages of sin are death.'

17. A stormy day. The storm commenced yesterday, shortly after the steam ship Acadia left port, and she must have had a severe time of it.

11. A fellow in North Carolina disguised himself in various devices, and in addition to every other, rigged on a club-foot, and then called on a rich old lady, to whom he announced himself as the devil. The family were actually frightened off the premises by his singular appearance; when his Satanic Majesty helped himself to the woman's money, and escaped. On his retreat he was met by a man who was returning from a muster, armed with a gun. On seeing the strange figure before him, he demanded who he was; "I am the prince of darkness," he replied. He then commenced puffing, emitting smoke, &c., which not exactly suiting Jesse Braddock, who smelt sulphur also, he fired away with unerring aim, which killed the monster instantly. Soon after, arriving at the frightened household, they compared notes, and having narrated his encounter, they retraced his steps till they came to the dead body, which, on being washed, proved to be a person who had been their neighbor many years.

Such is the distress of the poor afflicted families, that their case appeals most powerfully to the sympathies of all who are able to give bread to the needy and garments to the naked. No disaster in those regions, since the settlement of New England, will compare with this dreadful dispensation of Divine Providence.

On Sunday morning, in fear, she fled to a neighbor's house, a few rods off, taking her only child, leaving him sitting before the fire. An unusual smoke being seen from his chimney, some of the neighbors went over, and found him lifeless on the fire. O! the horrors of intemperance, throughout the length and breadth of these United States!

A young girl, yesterday morning, named Jane Noble, in New York, was accidentally shot by her father. Fearing an attack by some dissolute characters, he kept arms ready loaded, to resist them with. before ordering him to be locked up till sober, for further inquiry, ordered his pockets to be examined, whence one roll of bills was taken, containing \$14,000, and a separate \$100 bill and two checks — all on the Eagle bank at Boston. The money is in the Justice's keeping.

Since the enactment of the above, both Messrs. Cook and Thompson were put under bonds of \$50,000 each; which they procured. Afterwards their bonds were reduced to \$1000 each, and from that to nothing, both having made satisfactory arrangements with the bank at Boston. They were of course discharged.

Fires in Boston during the year 1841.

JANUARY.

1. A fire broke out in the fourth story of the building occupied by Manning & Glover, feather merchants, and Abel Phelps, grocer. It was extinguished with little damage to the building, but the goods were injured by water, to the supposed amount of between \$2,000 and \$3,000. Not known how it originated.

25. The bed-curtains in house belonging to J. Simmons, No. 7, Staniford st., third story, caught from a lamp. The fire was extinguished without an engine, although considerable damage was done to the furniture.

27. On Wednesday night an alarm was caused, about 1 o'clock, by a fire in a large building in Washington st., nearly opposite Avon place, in a part that had been vacant more than a year. The lower apartments, on the street, were occupied by H. F. Parmelee, Frothingham & Roberts, and B. F. Horne, dry goods dealers, and S. H. Beal, shoe dealer. Goods much injured by the water, and the interior badly damaged. Undoubtedly set on fire.

30. An alarm proceeded from No. 6, Clinton st., on Saturday night. The lower floor and second story were occupied by J. H. Cottrell, for a Clothing store and Shipping office; the upper story for cigar making, by W. H. Peyton. The interior of the first and second stories was consumed, and Mr. Cot-

trell's stock entirely destroyed. His loss was between \$4,000 and \$5,000, of which \$2,000 were covered by insurance; Mr. Peyton's loss, \$300. The building was fully insured. There was no doubt of its being the work of an incendiary.

FEBRUARY.

14. Some shavings took fire in Canton st., this morning, doing a trifling damage to a building. At 11 o'clock, last night, there was a fire under the grocery of Isaac Livermore, in Chickering & Mackays' building, Washington st. Being confined to the cellar, the damage was not great; it caught from a furnace.

19. Yesterday, a fire broke out in the second story of Amasa Stetson's building, No. 7 Market square, which was extinguished without having extended beyond where it originated.

22. On Monday evening, not far from 10 o'clock, a fire was discovered in the Dry Goods store of Messrs. Stone & Smith, No. 39 Hanover st., which was soon put out, without doing much injury, although the stock was somewhat injured by water. It caught from some boxes, placed near a stove.

APRIL.

9. Last evening, a fire was discovered in the third story of Haskins' building, corner of Howard st., occupied by

C. Nowell & Co., block-letter cutters. It was confined to the room. No doubt exists of its having been set on fire. Messrs. N. & Co. lost most of their tools, without any insurance. Dry goods, in stores below, slightly injured by water.

12. The lead pipe factory of Mr. A. White, No. 109 Ann st., took fire, last evening, which extensively injured the building and contents. Although there was a smart wind, the firemen soon mastered the fire. A large quantity of valuable tools and stock was destroyed; insured at the Mechanics' Mutual office.

MAY.

5. About 4 o'clock, this morning, the shop of J. Hills, Shoemaker, No. 7 School st., was discovered to be on fire, the interior of which was considerably injured, and Mr. H.'s valuable stock destroyed, without insurance, the policy having expired a month before.

JUNE.

18. The kitchen of Concert Hall, corner of Hanover and Court sts., occupied by Mr. Brigham, was discovered to be on fire, about 2 o'clock, this morning. The occupants of the upper story got out with difficulty, owing to the density of the smoke. They escaped through the scuttle, to the next building. One person jumped from the upper story to the awning, fronting Court st., and was but slightly injured. Damage considerable; cause accidental.

22. Yesterday morning, not far from 2 o'clock, the Blacksmith shop of Reuben Reed, Elm st., took fire, but was saved by the promptitude of the firemen, without doing much damage.

28. Some Japan took fire in the Drug-gist store of Messrs. Carruth, near the head of Long wharf, which caused an alarm, but no injury of consequence was sustained.

JULY.

5. Not far from 9 o'clock, Monday evening, when nearly the whole population of the city was on the Common, to witness the exhibition of fireworks, a fire broke out, at the foot of Castle st. and Harrison avenue, commencing in a Carpenter's shop, which was consumed, with four or five contiguous low wooden buildings. It was supposed to have been an incendiary act.

On Monday noon, a shed on Second st., South Boston, formerly a bottle factory, was destroyed. An adjoining brick building took fire in the roof, and was badly injured.

17. The Fringe and Tassel manufactory of E. C. Judkins, second story of No. 201 Washington st., was discovered to be on fire, but speedily put out with buckets.

22. A large old wooden building, in the rear of No. 49 India st., occupied by Irish families — called the *pigeon-house* — took fire in the upper stories, but was finally saved, without essential loss. A woman jumped from an upper story into the street, and was apparently lifeless, when taken up.

23. About 4 o'clock, P. M., yesterday, a fire broke out in a rough shed, in Albany street. Considerable lumber was burnt up, some valuable window-blinds, &c., in all valued at about \$500. It was imagined to have been fired by some crackers, with which boys had been playing, near by.

SEPTEMBER.

NOVEMBER.

6. On Wednesday evening, the storehouse on Cunard's wharf, East Boston, was seen to be on fire, which, being under the floor, for a long time baffled the skill of the department. It was unquestionably set on fire; the object being the destruction of the Atlantic steamship *Columbia*, then in her berth. She was fortunately towed out of the way by a ferry boat, without any injury accruing to her.

8. At about 12 o'clock, last night, the cabin of the brig *Bulah*, a lumber vessel, lying near the Lowell depot, took fire, but the vessel was not much injured. It being very dark, and low tide, Mr. Enoch H. Snelling, jr., of Engine No. 3, fell overboard, and must have drowned, had it not been for the timely exertions of Mr. Milton Hall, jr., foreman of No. 8, who jumped in and rescued him, when sinking for the third time.

20. At 3 o'clock, this morning, a fire broke out in a morocco factory, Franklin place, Charlestown, owned by Mr. G. Emerson, and occupied by M. B. Sewell. The building was destroyed, and most of its contents, and the fire finally spread, and before it could be controlled, destroyed four dwelling houses on Bartlett street. They were owned by Mr. P. J. Stone, and worth about \$4,000, but only partly insured. A block Franklin place was several times on fire, but fortunately saved without essential injury.

Nov. 27. About 4 o'clock this morning, the Homer house, corner of Derne and Bowdoin streets, took fire in the floor, probably from a coal. Little damage.

THE PUBLIC PRESS.—An examination of the above catalogue evidences the fact, that the periodical press in Boston requires a high order of talent, to conduct these various publications. A vast amount of capital is necessarily invested in these enterprises; yet all experience proves, most conclusively, that no business is more uncertain, or attended with such untiring anxiety. Instead of being profitable, as might at first be supposed, from the number who are engaged in it, many of these periodicals are incessantly struggling for a feeble existence. Where one becomes permanently successful, scores of adventurers are utterly ruined. The true principle upon which the periodical press should be sustained in the United States, seems not yet to have been discovered. A less ruinous spirit of competition with the trade, at prices obviously below the cost, with the general introduction of the cash system — PAYING AT SIGHT, — seems to be universally demanded.

That if any branch pilot of the harbor of Boston offers himself to any vessel liable to take a pilot, outside of a line drawn from Harding's Rocks to the outward Graves, and from thence to Nahant Head, if inward bound; or any branch pilot who may first offer himself to any vessel outward bound, (the pilot who brought in said vessel, or one belonging to the same boat, in all cases to have the preference,) and the master of the vessel should refuse to take such pilot on board, the masters and owners of said vessel, or either of them, shall incur and be liable to the penalty of the amount of pilotage said vessel would pay, for the benefit of the pilot so offering himself, if he be the complainant.

That if any vessel while under the charge of a branch pilot, or his apprentice, shall be lost or run aground, or sustain any damage, through the negligence or unskillfulness of such branch pilot or his apprentice, such branch pilot shall be liable, not only for himself, but for his apprentice, to pay the owner of such vessel all damages, and also be liable to have his branch or commission taken from him.

That no branch pilot for the harbor of Boston be allowed to make

or combine or be in any way interested in the business of pilotage for said harbor, with any other branch pilot, except those who may belong to the same boat with himself, under the forfeiture of his branch.

That it shall be the duty of every pilot, after having brought a vessel into the harbor of Boston, to have such vessel properly moored in the stream, or secured to a wharf, at the option of the master, within twenty-four hours after the arrival of said vessel, if the weather permits, without extra charge. The pilot, if called upon after the expiration of twenty-four hours from her first anchoring to haul any vessel into the wharf, shall be entitled to receive three dollars for his services; and a pilot shall be entitled to receive the same for taking a vessel from the wharf into the stream, provided said vessel does not proceed to sea within twenty-four hours from the time of her anchoring in the stream.

That if any vessel outward bound, having a pilot on board, should be compelled, either by a head wind or a head tide, to anchor in Nantasket Road, it shall be the duty of the pilot to remain on board said vessel until the next high water, (if requested by the master so to remain,) and if, at the expiration of that time, the master does not see fit to proceed to sea, and wishes the pilot to stay by him longer, the pilot so remaining shall be entitled to receive two dollars per day, for each and every day he may be detained on board said vessel, over and above the regular fee for pilotage; but no pilot shall leave a vessel outward bound proceeding directly to sea, without the permission of the master, until said vessel is to the eastward of George's Island.

That the hull and appurtenances of all vessels piloted into or out of the harbor of Boston, shall, at all times within sixty days, be liable for the fees of pilotage.

That from and after the first day of May, 1835, each pilot boat in the employ of the branch pilots for the harbor of Boston, may have on board one or more apprentices to be regularly indented to one or more branch pilots attached to the boat, who shall, after having served not less than two years, and on examination and approval of the Trustees of the Boston Marine Society, be authorized to pilot vessels of certain draft of water; and further, that not less than four boats shall be kept in constant employ by branch pilots.

That no apprentice belonging to either of the pilot boats, shall take charge of any vessel drawing a larger draft of water than his warrant authorizes; nor shall any other person from either of the pilot boats (not having a branch) be put on board of any vessel, unless a branch pilot is not to be obtained. And in event of their taking charge of any vessel, as above, they shall cause the usual signal for a pilot to be kept flying, until within the line drawn from the Harding's Rocks to the Graves and Nahant Head; and shall give the vessel up to any branch pilot or authorized apprentice that may apply previous to getting within the said line.

Any apprentice who shall omit to give true information respecting his authority, or refusing to give up a vessel to an authorized pilot when he has charge unlawfully, shall forfeit his warrant.

That a blue and white signal, similar to Parker's Telegraphic, No. 3, be established as a signal for the pilot boats for the harbor of Boston, to designate them from other small vessels.

The present arrangement is, that each pilot boat shall take turns for the outside berth in the Bay, and take all vessels (both large and small) that she can board, until all her pilots are out, when she is to be relieved by the boat having the next inside berth, and so to continue in rotation.

In order that the regulations may be carried into full effect, two masters have been appointed to each boat.

*** Vessels drawing less than 7 feet are not obliged to take a pilot.

BOSTON POST OFFICE.

GEORGE W. GORDON, *Post-Master.*

No essential changes have taken place in the general details of the Office since the last year. With the growth of the city, and the increasing commercial and internal intercommunication by the extension of rail-roads, the business has necessarily increased beyond the most sanguine expectations of those who have at heart the prosperity of Boston. This has become one of the most important, if not profitable offices, to the government, in the Union. It is not uncommon for the letters brought in a steam packet from England, to yield a postage of fifteen hundred dollars on the letters and packages destined for New York alone.

At present, the location is very convenient to the citizens, and the rooms are sufficient for the transaction of all the labors of the various clerks, without incommoding each other. The entire first floor of the Old State House, at the head of State street, is in the occupancy of the Post-Master. Strangers receive their letters at an entrance on Washington street, whilst those who have a quarterly account, have access to their boxes on the north and south sides of the edifice, from State street. The arrivals and departures of the Mails, both by land and water, remain as they were in 1841, with a few trivial exceptions.

Mails for *Liverpool*, England, are despatched from the Boston Post-Office, by Steam Packets, on the 1st and 15th of the months of March, April, May, June, July, August, September, and October; and on the 1st day of the months of November, December, January and February.

In these Mails, letters addressed to any person, or to the care of any person, in any part of the Kingdoms of Great Britain or France, may be sent, on the payment of one cent for each letter at the Boston Post-Office. Letters for these Mails can be forwarded from any Post-Office in the United States, by mailing them to Boston for distribution, post paid to Boston;—nothing more is necessary.

Fire Department of the City of Boston.

WILLIAM BARNICOAT, *Chief Engineer.*

In the organization of this useful and important arm of safety, against the ravages of a devouring element, no essential changes have been made since last season. It maintains a deservedly high character for vigilance, and therefore enjoys the perfect confidence of the whole community.

The corps consists of 1 chief and 10 assistant engineers; the first receives a salary of \$1000, and the others, \$100 each, per annum. Engines, 14; feet of leading hose, 9828; suction hose, 367 1-2 feet; hose carriages, 18; buckets, 143; axes, 32; hook and ladder carriages, 1; hooks, 4; ladders, 15; reservoirs, 53; fire plugs, 33; wells, 12; engines not in use, 7; leading hose not in use, 1050 feet; suction hose not in use, 108; bucket carriages not in use, 30. In the smallest compass, we have

presented a statistical view of the resources of this very important department, since the adoption of the plan of paying each member for his services. Good order, promptitude, and indomitable perseverance have uniformly characterised the labors of the firemen of Boston. A suggestion has heretofore been made in regard to some modification of the present system of announcing the direction of a fire. Until some central position is fixed upon, where, at an elevation commanding a view of the whole city, a watchman, at all hours, both night and day, indicates the section in which fire is seen, there will remain an imperfection in the structure. It will ultimately be established as the last finishing process of the fire department of Boston.

Facts in regard to the Census of the United States.

An investigation of the six returns of the census, taken at intervals of ten years each since the adoption of the constitution, shows some curious facts:—

1. The population of the United States increases exactly 34 per cent. each ten years, and which doubles every twenty-four years. The law is so uniform and permanent, that when applied to the population of 1790, and brought down to the present time, it produces nearly the very result as shown by the census of 1840. And thus we may tell with great accuracy what will be the census of 1850. It will be nearly twenty-three millions.

2. But although this is the aggregate result, it is by no means true of each particular part of the country; for New England increases at the rate of 15 per cent. each ten years, while the north-western states increase 100 per cent. in that period.

3. The slave population increased at 30 per cent., but since at less than 25 per cent. The free population have, however, increased at the rate of 36 per cent. At this rate, therefore, the difference between the free and slave population is constantly increasing.

4. Another fact is that the colored population increases just in proportion to the distance south; and that slavery is certainly and rapidly decreasing in the states bordering on the free states.

This state of things continued, would, in half a century, extinguish slavery in these states, and concentrate the whole black population of the United States on the Gulf of Mexico, and the adjacent states on the southern Atlantic.

With a Sketch of some of the Principal Events in the Administration of each.

It is now nearly twenty years since Boston was incorporated with city powers. The act was passed in Feb. 1822, and the election of city officers took place in April following. A proposition had been made several years before, for a city charter, but the majority till 1821-2, opposed it. The fear of great additional expense was the chief objection to it. Under the town government, Charles Bulfinch, Esq. was a member of the board of Selectmen from 1789 to 1793. He was Chairman from 1797 to 1818—TWENTY-ONE YEARS, during which time he was Superintendent of Police, salary \$600, till the two last years, when it was raised to \$1000. By his exertions a law of the State was obtained, giving power to the Selectmen to widen streets and regulate pavements; another to establish the Municipal Court. Several improvements were made at this early day, and when Mr. Bulfinch retired from office, the debt of the town was only \$14,000. Population in 1818, 40,000. Turner Phillips, Esq. was chairman for two years, and Eliphalet Williams, Esq. was the last chairman. The expenses of the city have been much increased, compared with those of the town. But it should be remembered, that the population has more than doubled. The town was composed with two or three exceptions, of narrow and crooked streets. In few of the streets could one pass conveniently in a carriage, when another was coming in an opposite direction. This was the case with even the central streets of Court and School.

Great improvements have been made in this respect in the city; and no respectable citizen, who has any pride as a Bostonian, or even a regard for the health of the people, will regret the expenses incurred for these advantages and blessings. Whether sufficient economy has been used in securing these benefits, we need not inquire. Nor is it, perhaps, important, at this period, to decide which of our worthy citizens who have held the office of mayor, have contributed the greatest share to the work of improvement.

Hon. JOHN PHILLIPS, the first Mayor, was elected in April, 1822, by a very large majority of votes. He was a Senator for Suffolk, and for many years had presided in that body, with great impartiality, promptness and dignity. He died suddenly, in May, 1823. A writer of the day, who knew him well, spoke of him as "one of our most eminent, worthy and useful citizens; prudent, judicious and economical." Some objected that he had not sufficient energy. But his prudence was far better than rashness. And it was not possible

to say, in the first year of the city government, how great expense the people would have borne.

In 1823 Hon. JOSIAH QUINCY was chosen Mayor, Mr. Phillips having declined. Mr. Quincy had more energy as mayor, and early discovered a desire to make improvements in the city, even at a great expense. He was elected for six years successively; and many improvements were made during his mayoralty. A new and extensive building for a market house was erected of stone, and is of great benefit to the city. The common was improved by him.

Hon. H. G. OTIS was elected mayor in 1829, and continued in office three years. His administration was also efficient, and conducive to the improvement of the city. While he was mayor, the City Council held their meetings in the old State House, or Town House, near the head of State street. Before, their meetings were in Court square, School street, and which is now again occupied by the City Council, the Mayor and Aldermen, and other Municipal officers.

Hon. CHARLES WELLS, succeeded Mr. Otis as Mayor, in 1832, and was also chosen for the year 1833. He was acceptable and popular, and always desirous of fulfilling the will of his constituents when fairly and clearly expressed. One of the public school-houses built while he was in office, bears his name.

Hon. THEODORE LYMAN, Jr. was the next Mayor. He was elected in 1834, and served two years, when he declined the office. His administration gave general satisfaction; and he was deemed a vigilant and faithful chief magistrate of the city. During his mayoralty, the new, and spacious Court House on the margin of Court street, which was planned, and voted to be erected in 1833, was rapidly advanced in building—but not completed till 1837.

Hon. SAMUEL T. ARMSTRONG, was acting Governor of Massachusetts when he was chosen to be the Mayor of Boston. During his administration the burying place was removed from Boylston street, and the mall on that street was laid out, by removing sixty-nine tombs, and building sixty new ones within the present enclosure. The iron fence around the common, which is more than one mile in extent, was erected, and the walks outside the fence laid down. The cost of these improvements was about \$100,000. They were commenced in July, and completed in December! The City Coun

cil appropriated a large sum for this object, and the citizens residing near the common, with a few others, contributed liberally toward the expense. During this year incendiaries were active—the meeting houses in Brattle street, and Essex street were set on fire. The City Council placed \$10,000 at the disposal of the Mayor, for the suppression of these enormities. Two new schools were opened this year, one on East street, for boys, called Winthrop school, the other in Tremont street, for girls, called Johnson school. Mr. Armstrong declined a re-election, and

SAMUEL A. ELIOT, Esq. was chosen Mayor for 1837, and also for the two following years. He was a faithful and efficient chief magistrate, and carried out the general plan for improving the city, which had been adopted and pursued by his predecessors. He effected an alteration in the fire department of the city; a measure which required decision and firmness, and which has been found a great improvement, as well as very efficient. On

Mr. Eliot's declining to hold the office another year,

JONATHAN CHAPMAN, Esq. was chosen for 1840, and again for 1841. [Mr. Chapman has been chosen again for 1842; and of his administration during this year we may speak hereafter.] He also performed the important duties of mayor with great fidelity and judgment; and fully sustained the respectability of the office, imparted to it by his able and worthy predecessors. Mr. Chapman, perceiving the great and increasing debt of the city, recommended a policy of retrenchment and reform in expenses, as far as the public interests and welfare would permit. The state of the city finances loudly called for this course. No necessary work of improvement was neglected by him; but economy was adopted so far as reason and propriety would allow. Mr. Chapman has also done all a faithful guardian of the public morals could justly be expected to do, in his legal and judicious measures for checking the infinite evils of intemperance.

STEEL PENS AND PENHOLDERS.

~~~~~  
**THOMAS GROOM & CO.,**  
**No. 82 State Street, Boston,**

Keep constantly for sale all the best and most approved kinds of Steel Pens now in use—consisting of GILLOTT'S, PERRY'S, WINDLE'S, PARDOW'S, &c.

They are constantly receiving supplies of the celebrated Joseph Gillott's Pens, direct from the manufacturer, which are considered to be equal, if not superior to any kind offered for sale, and can now furnish the trade on as reasonable terms as can be purchased of any importer of Steel Pens in the United States.

The universal celebrity of these Pens has induced certain disreputable Makers to foist on the public a spurious article bearing the mis-spelled name of the Patentee and Sole Manufacturer, thus, "GILOTT," by omitting the L; and in some instances the omission of the final T is fraudulently resorted to, in order to retain the same SOUND as GILLOTT; but observe,

*None are genuine but those marked in full,*

**JOSEPH GILLOTT.**

**THOS. GROOM & CO., NO. 82 STATE STREET,**  
A NEW EDITION OF

**TALES OF THE OCEAN.**

This is a very neat volume of 432 pages, illustrated with many fine and spirited Engravings. These tales originally appeared in the Boston Evening Mercantile Journal, the Editor of which remodelled and revised them for their appearance in the present volume. The sketches are truly graphic, and replete with interesting incident. Being of a moral tone, they are designed not only to make the reader wiser, but better. The author of them being for many years engaged in the arduous and perilous duties incident to a sea-faring life, may well be supposed to have drawn the sketches with a master hand. They have received the highest encomiums from the editorial fraternity. Being got up in a beautiful style, they form a very attractive volume; and so much are they esteemed by the reading community, that two or three editions have already been sold.
